TerraBioGen Files Patent for Plant Growth Promoter

Vancouver, BC, April 27, 2011 — TerraBioGen Technologies Inc. (TSX-V:TBG), a developer and marketer of proprietary technologies for the production of organic-based, high-value agricultural products from organic wastes, is pleased to announce today that it has filed patent application for its F4 plant growth promoter.

The Company's scientists have determined that the F4 plant growth promoter is one of the key active ingredients in its products that are responsible for crop-yield increase. For several years, the Company has been conducting intensive research toward the identification of the active ingredients in its products.

Blair Heffelfinger, President and CEO of TerraBioGen, commented, "With our expanded research department, we are very proud to have achieved this key milestone in our development plans. This validates the performance increase in our products that we have consistently achieved during field trials. We will continue to isolate and identify additional active ingredients that impart the unique benefits our products deliver in enhancing agricultural yields."

About TerraBioGen

Located in North Vancouver, BC, TerraBioGen Technologies Inc. is committed to research and development to continue to improve the efficiency of its technology and the quality of its agricultural products. It is further committed to developing a worldwide marketing capability to ensure market acceptance of its products.
