TerraBioGen Receives Funding Award through Canada-BC Agri-Innovation Program

Vancouver, Canada, July 26, 2016

TerraBioGen Technologies Inc., a developer of proprietary high-value agriculturally bioactive products, announces a funding award from the Government of Canada and the Government of British Columbia through the Canada-BC Agri-Innovation Program under Growing Forward 2, a federal-provincial-territorial initiative. The program is delivered by the Investment Agriculture Foundation of BC.

The award of \$37,500 will be applied towards market demonstration and development of TerraBioGen's next generation plant biostimulant products in British Columbia's ornamental plant and floriculture industries.

"We are grateful to Agriculture and Agri-Food Canada and the BC Ministry of Agriculture for recognizing the value of TerraBioGen's plant biostimulant technology. This project is an expansion of trials conducted last year on poinsettia that showed better establishment, faster crop finish, and improved post-harvest stress tolerance. We will be extending this analysis of performance to other potted plant varieties, cut flowers, foliar crops and bedding plants. The goal is to offer technologies that allow growers to produce a better product at a lower cost." said TerraBioGen's CEO, Blair Heffelfinger.

About TerraBioGen

TerraBioGen Technologies Inc. is a developer of innovative, proprietary, high-value, environmentally sustainable bioproducts and biostimulants that improve crop health and yields, and increase abiotic and biotic stress tolerance in agricultural and horticultural crops. The Company is committed to research and development to continue to improve the effectiveness of its technologies, the quality of its products, and the creation of new product lines. Further, the Company is taking steps to secure intellectual property rights to these bioproducts and to formulate them in order to fully commercialize their potential.
